### Cheyne Convertibles Absolute Return Fund (the “Fund”), a sub-fund of Cheyne Select UCITS Fund plc Class D2 (€) ISIN: IE00B3M96P23

#### Objectives and Investment Policy

- The Fund seeks to achieve attractive long term capital appreciation, regardless of market conditions, by investing in a diversified portfolio of Convertible Securities.
- The Fund will invest primarily in Convertible Securities (fixed income securities and equities that can be exchanged or converted into common stock) selected through rigorous analysis of the financial soundness of the issuer and anticipated performance of the stock into which they may be converted.
- The Fund may also invest in fixed income securities (government or corporate issued) and equities as well as money market or exchange-traded funds (up to 10% of the net asset value).
- Through Derivatives use, the Fund may gain more exposure to the underlying investment than if it had directly invested in it (“Leverage”), subject to a maximum of 600% of the net asset value (“NAV”).
- The Fund will use Derivatives (instruments whose value is based on the performance of another financial asset, index or investment) for both investment purposes and to protect against movements in asset prices, foreign exchange or interest rates.
- The securities in which the Fund invests may be of any credit quality and may be from issuers of any industry, region or market capitalization, provided no more than 30% of the Fund’s net asset value may be attributable to issuers in Emerging Markets.
- Any income earned by the Fund (less expenses) will not be distributed to investors but will be accumulated into the net asset value of the Fund instead.
- Investors may buy or redeem shares each day on which the banks are open for business in London (“Business Days”), with one Business Day’s prior notice for purchase and four Business Days’ prior notice for redemptions.
- Recommendation: investment in the Fund may not be appropriate for investors planning to withdraw their money within 2 (two) to 4 (four) years.
- For full investment objective and policy details as well as subscription and redemption policies, please refer to the Fund supplement.

#### Risk and Reward Profile

The Fund is categorised as a 3 as it mostly invests in Convertible Securities and Derivatives, which may lead to higher levels of price fluctuation in the net asset value than if the Fund invested only in fixed income securities. The lowest category on this scale does not mean risk free.

The categorisation is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The risk category is not guaranteed and may change over time. The lowest category does not mean risk free.

The Fund does not provide any capital protection or return guarantee.

For more details, please refer to the section of the prospectus entitled “Risk Factors”.

In pursuing its investment objective, the Fund will be exposed to additional risks including, without limitation:

Leverage can magnify gains and losses, particularly in periods of abnormal and adverse market conditions.

Certain Derivatives may result in gains or losses greater than the original amount invested.

A party with whom the Fund contracts for securities may fail to meet its obligations or become bankrupt which may expose the Fund to a financial loss.

The assets of the Fund may generally be bought and sold readily under normal market conditions. However, an asset, or underlying asset in the case of Convertible Securities and Derivatives, may have insufficient buyers and sellers to allow it to trade readily in abnormal market conditions, which may make it difficult to purchase or sell it at an advantageous price.

Convertible Securities expose the Fund to the risk the issuer of the fixed-income portion of the security may fail to meet its obligations as well as the performance of the underlying stock into which it can be converted.

The Fund attempts to hedge currency exchange risk non-Euro classes. There can be no guarantee hedging will work.
